

Application of Pesticides

Public Act 451 of 1976, as amended, requires school districts to inform parents/guardians regarding the application of pesticides made in school buildings and on school properties. As a part of New Life Christian Academy's pest management program, pesticides may be applied in school buildings.

Application of pesticides by certified applications occur on a monthly basis after school hours. **(Note:** Pesticides are rarely applied. Our extermination company, *Rose Exterminating*, uses natural methods and traps first.)

Parents and guardians have the right to be informed prior to any pesticide application made to the school grounds and/or buildings. In certain emergencies, pesticides may be applied without prior notice, but you will be provided notice following such application.

If you would like prior notification of pesticide applications other than the monthly maintenance application, please complete the information requested below and submit it to the school office. If there are further questions, please contact the office at (810) 367-3770.

Our monthly integrated pest management services are scheduled for the SECOND THURSDAY of each month. The technician will work after normal school hours.
